

# FOOD PULP LIQUID CONCENTRATE

## SCE Bio Food Pulp

Liquid Concentrate is a liquid blend of specifically selected microbes formulated to accelerate the decomposition and digestion of sludge generated by fruit and vegetable processing and to consume excess nutrients.

The use of Integrated Bio FP in conjunction with aeration reduces BOD and COD levels and is ideal for treating wastewater generated during fruit and vegetable processing. Integrated Bio FP will breakdown excess amounts of hemicelluloses, celluloses, pectins, and sugars and is safe to use in food pulp machinery.

Integrating  
biotechnology  
for a greener  
world.

### Benefits

- Keeps pulper systems clean
- Perfect for large-scale service eateries
- Safe to use around people and animals
- Reduces the amount of food waste being sent to landfills or incinerated
