

WASTE TREATMENT

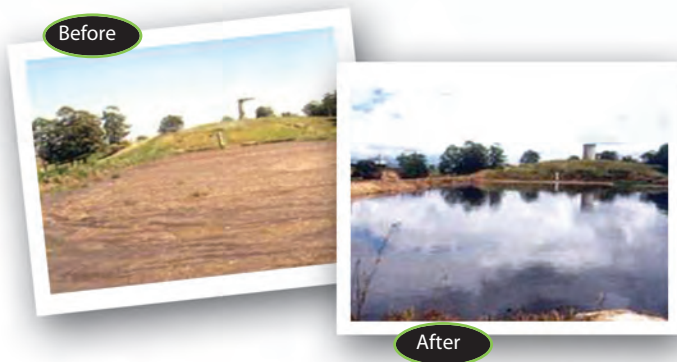

LIQUID CONCENTRATE

SCE Bio Waste Treatment

Liquid Concentrate is a completely natural, liquid blend of naturally occurring and specifically selected microbes formulated to accelerate decomposition and digestion of biomass (sludge) and to consume excess salts including nitrates and phosphates in wastewater treatment lagoons and holding tanks.

Using Waste Treatment Liquid Concentrate in conjunction with mechanical aeration is a more efficient and less odorous waste reduction process that is completely safe to use around people and animals.

Integrating biotechnology for a greener world.

Benefits

- Natural waste treatment
- Reduces odors
- No toxic chemicals needed
- Easy-to-use instructions
- Good for livestock waste
- Waste Treatment is also available in liquid, solid and granular form
